

Assembling Posters 1

Print the poster and lay it out in the order it will be when finished

Trim the left edge of the sections laid out on the right.

Trim the top edge of the bottom sections.

This is how the sections will look after they are trimmed.

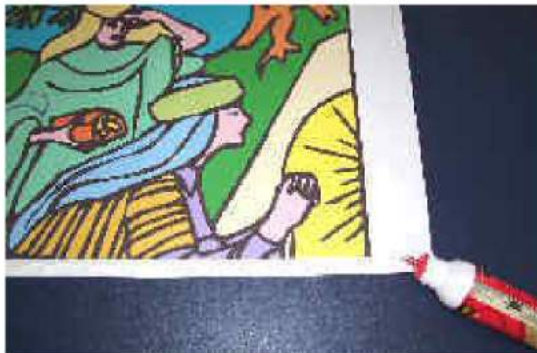

Assembling Posters 2

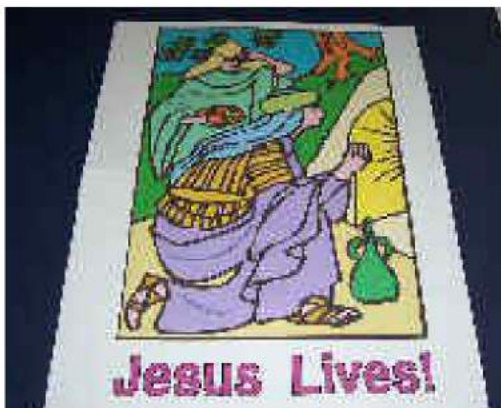

Put glue on the edges of the left top sections and glue the two sections together.

This is how it will look after the left and right sections are glued. Do just the top section.

Put glue on the bottom edge of the top section and line up the sections. Do the bottom sections one at a time. It is easier to line them up that way. Do the left bottom section first.

Press the left bottom section on to the glue while lining up all lines. Then glue the right bottom section on. Your poster is finished and ready to be put up on a bulletin board or wall.
